Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1,4,7 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 7, what is meant by, "a second drive device for bring said wafer", in lines 3 and 7, respectively.

In claims 4 and 10, it is unclear how the nozzle is held in a position by the piping on the center axis. Is the piping on the center axis?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,2,4-8 and 10-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Tolles.

Art Unit: 3723

Tolles teaches an apparatus for cleaning a polishing pad of a CMP polishing system which includes a first drive device coupled with the polishing pad, 100, and a second drive device for bringing the wafer, 20, into contact with the polishing pad, a dispenser, 40, located above the polishing pad, and adapted for dispensing a slurry, 32, to the polishing pad, an extension, which includes piping, and a plurality of nozzles, 44, 46, for delivering a wash solution, which is de-ionized water, to the polishing pad, the piping coupled to and extending from the dispenser toward a center axis of the pad, and along an area from the circumference of the pad to the center axis, the piping cooperable to direct a water spray to the pad at a ninety degree angle, (col. 8, lines 23-44, fig. 6).

Allowable Subject Matter

Claims 3 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Huey and Koga et al were cited to show other examples of polishing pad cleaners.
